## PROFESSIONAL SUMMARY

Mechanical Engineering diploma holder with over 1 year of industrial maintenance and machine operation experience in a manufacturing environment. Skilled in preventive, corrective and breakdown maintenance, troubleshooting, conveyors, motors, pneumatic systems, compressors, sensors and equipment inspection. Experienced in production machine operation and maintenance with increasing ability to work with minimal supervision. Completed Caterpillar Technicians for the World training and focused on practical, safe and reliable equipment maintenance.

## TECHNICAL SKILLS

- Preventive, corrective and breakdown maintenance
- Mechanical troubleshooting and fault diagnosis
- Industrial machine operation and machine changeovers
- Pneumatic systems: valves, cylinders, solenoids and actuators
- Belt and chain conveyors maintenance
- Motor inspection, monitoring and basic maintenance
- Sensors and machine condition monitoring
- Air compressors and compressed-air systems
- Lubrication, alignment and routine equipment inspection
- Production equipment: MX4, IRIS 16, IRIS 5, Bertram Divider and Palletizer
- Engineering drawings and AutoCAD
- Workplace safety procedures

## PROFESSIONAL EXPERIENCE

**KIOO LIMITED** — Mechanical Technician / Maintenance | Aug 2025 – Present

- Perform preventive, corrective and breakdown maintenance on production and material-handling equipment.
- Operate production machines including MX4, IRIS 16, IRIS 5, Bertram Divider and Palletizer, with the ability to work with limited supervision.
- Inspect and troubleshoot mechanical, pneumatic and sensor-related faults to support safe and reliable machine operation.
- Maintain belt and chain conveyors, motors, pneumatic valves, cylinders, solenoids, actuators and compressed-air systems.
- Participate in machine changeovers, equipment inspections and maintenance activities to reduce downtime.
- Work closely with production and maintenance teams to resolve recurring equipment problems and improve machine availability.

**TAZARA WORKSHOP** — Mechanical Workshop Experience | 4 Months

- Assisted with maintenance and repair activities on mechanical equipment and workshop systems.
- Supported preventive maintenance tasks, inspections and basic troubleshooting under supervision.
- Gained practical exposure to workshop safety procedures, tools and mechanical maintenance practices.

## EDUCATION

**Diploma in Mechanical Engineering** — St. Joseph University in Tanzania | 2021–2025

Completed final examinations in July 2025. Academic achievement: Best Performing Student.

## CERTIFICATIONS

- Caterpillar – Technicians for the World (Completed 14 July 2026)
- Diploma in Mechanical Engineering – 2025
- Technician Certificate in Mechanical Engineering – 2024

## ACADEMIC PROJECT

**Portable Grain Loading Machine** — Team project focused on reducing manual labour and improving grain loading efficiency.

## LANGUAGES

English — Professional Working Proficiency | Swahili — Native
