PROFESSIONAL SUMMARY

JD Technical Support Specialist supporting John Deere agricultural and construction equipment, with a Mechanical Engineering diploma and practical industrial maintenance experience. Experienced in customer technical support, equipment inspection, troubleshooting, preventive maintenance coordination, technician coordination, service quotations, warranty monitoring and service follow-up. Strong hands-on foundation in pneumatic systems, conveyors, motors, sensors, compressors and production machinery, with a safety-focused and continuous-learning approach.

TECHNICAL & PROFESSIONAL SKILLS

- Customer Technical Support & Service Coordination
- Equipment Inspection & Fault Diagnosis
- Troubleshooting & Preventive Maintenance Coordination
- Technician Coordination & Technical Communication
- Service Quotation Preparation & Customer Follow-up
- Warranty Status Monitoring & Service Planning
- Preventive, Corrective & Breakdown Maintenance
- Pneumatic Systems: valves, cylinders, solenoids and actuators
- Belt & Chain Conveyors; Motors; Sensors
- Air Compressors & Compressed-Air Systems
- Industrial Machine Operation & Changeovers
- Engineering Drawings, AutoCAD & Workplace Safety

PROFESSIONAL EXPERIENCE

JD TECHNICAL SUPPORT SPECIALIST | October 2026 – Present

Pannecia Consulting Services Limited — John Deere Assignment

- Support customers regarding John Deere machine condition, performance, service status and maintenance requirements.
- Coordinate service-center and operational activities, including equipment inspections, maintenance requirements and technical follow-up.
- Guide technicians on machines requiring attention, inspection points, service priorities and troubleshooting requirements.
- Support systematic equipment troubleshooting using reported symptoms, inspection findings, machine condition and technical information.
- Coordinate preventive maintenance activities to support equipment reliability and reduce downtime.
- Approach customers regarding due or required services and explain the importance of timely professional maintenance.
- Prepare service quotations based on inspection findings, repair or maintenance scope, labor and parts requirements.
- Check equipment warranty status and help ensure eligible equipment receives required service within the applicable warranty period.
- Assist with parts identification, service documentation, customer follow-up and equipment service history.
- Monitor equipment performance and service history to identify recurring issues and upcoming maintenance requirements.
- Participate in field/on-site support where required, including equipment inspections, troubleshooting and customer assistance.

KIOO LIMITED — Mechanical Technician / Maintenance | Aug 2025 – Sep 2026

- Performed preventive, corrective and breakdown maintenance on production and material-handling equipment.
- Operated and maintained MX4, IRIS 16, IRIS 5, Bertram Divider and Palletizer systems, including work with limited supervision.
- Inspected and troubleshot mechanical, pneumatic and sensor-related faults to support safe and reliable machine operation.
- Maintained belt and chain conveyors, motors, pneumatic valves, cylinders, solenoids, actuators and compressed-air systems.
- Performed machine inspections, lubrication, component replacement and maintenance activities to reduce downtime.

- Worked with production and maintenance teams to resolve equipment problems and support machine availability.

TAZARA WORKSHOP — Mechanical Workshop Experience | 4 Months

- Assisted with maintenance and repair activities on mechanical equipment and workshop systems.
- Supported preventive maintenance tasks, inspections and basic troubleshooting under supervision.
- Gained practical exposure to workshop safety procedures, tools and mechanical maintenance practices.

EDUCATION

Diploma in Mechanical Engineering — St. Joseph University in Tanzania | 2021–2025

Completed final examinations in July 2025. Academic achievement: Best Performing Student.

CERTIFICATIONS

- Caterpillar – Technicians for the World | Completed 14 July 2026
- Diploma in Mechanical Engineering – 2025
- Technician Certificate in Mechanical Engineering – 2024

ACADEMIC PROJECT

Portable Grain Loading Machine — Team project focused on reducing manual labour and improving grain loading efficiency.

LANGUAGES

English — Professional Working Proficiency | Swahili — Native
